

How does MTPredictor™ help you trade professionally?

It allows you to trade a clear systematic process, in full knowledge and control of what you're doing - every time.

It answers the key questions of what to trade, which trades are worth the risk, how much to risk and how to manage the trades.

It controls risk, maximizes profit and doesn't rely on optimisation, lagging indicators or guesswork.

- **Unrivalled Trade Scanner finds complete trade set-ups**
 - **simple** - 'ABC' pattern corrections, to trade back into the trend.
 - **clear** - ABC corrections at a critical price level, and with price showing signs of reversal.
 - **comprehensive** - including the Entry and Stop levels, Risk/Reward analysis & Profit Targets.
- **Instant Scanner results**
 - Displays the set-up analysis, Risk/Reward outlook and Profit Targets with just 2 mouse clicks – saves time.
- **Automatic Entry Price, Initial Stop Loss price & Profit Targets**
 - Displayed on the chart for each trade *before* any entry.
- **Automatic Risk/Reward analysis**
 - displayed on the chart for you to assess the Risk/Reward outlook for each trade *before* any entry.
- **Early trade entry**
 - coloured price reversal bars signal entry, not lagging indicators: keeps initial money risk small.
- **Consistent exit stop strategy**
 - displayed on the chart for visual confirmation of your trade management plan.
- **Progress up the skills curve**
 - Advanced trade entry and trade management strategies available for expert traders.
- **None of the usual Elliott wave pitfalls**
 - charts are labelled *only* if there is a valid pattern based on price swings and labelling never changes mid-trade.
- **Dedicated Support**
 - Daily Report on trade examples/software use; Daily Roundup on real-time US index trading; Trading Course; online video and PDF Help Files; online web seminars; phone/email support; user group/discussion Forum.
